ABOUT US

The company **MALINA – Safety s.r.o.** specializes in the design, development and production of the complete range of personal respiratory protection systems CleanAIR®. Our products are designed with emphasis on the user's safety and comfort and are fully approved according to the relevant standards. Personal respiratory protection systems CleanAIR® are exported to more than 40 countries worldwide and represent a significant part of the respiratory protection market.

The long-term experience in the health and safety sector (since 1993) together with our own research and development team guarantee our ability to offer innovative and unique solutions even for special applications. The high quality of our products is ensured by our own production facilities located in the Czech Republic and process management meeting standards ISO 9001 and AQAP 2110.

Our powered air purifying respirators for personal protection offer a solution to the environments with diverse demands on the level of respiratory protection and are widely used in the manufacturing, chemical, pharmaceutical, food processing industry and agriculture.

THE IMPORTANCE OF RESPIRATORY PROTECTION IN OCCUPATIONAL SAFETY

The risk of respiratory illnesses and a potential impact on human health is an important problem in the workplace that should be taken into consideration by both employees and employers. If human lungs are exposed to high concentrations of dust, smoke, welding fumes, aerosols or toxic gases or vapours, their capacity can be decreased or they can be damaged. Some particularly dangerous substances can cause severe harm to other human organs. This risk can be effectively prevented with the use of personal respiratory protection equipment.

CleanAIR® – POWERED AIR PURIFYING RESPIRATORY SYSTEMS

CleanAIR® is a complete system of personal respiratory protection based on the principle of overpressure of the filtered air in the breathing zone. The system consists of a powered air respirator which is installed on the wearer's belt and filtrates the air taken from the surrounding environment through the efficient particle, gas or combined filters. The purified air is delivered through the breathing tube into a protective mask or hood.

The overpressure inside the system prevents the hazardous substances from entering the breathing zone. This mild overpressure at the same time ensures the wearer's comfort, even with long-term use, as the wearer is not forced to overcome the breathing resistance of the filter.

HOW TO SELECT PROPER RESPIRATORY PROTECTIVE EQUIPMENT(RPE)?

(based on knowledge of Nominal Protection Factor)

1. You need to know the concentration of the hazardous substance in a workplace

2. You need to know assigned Workplace Exposure Limit (WEL)

The list of the most typical contaminants and relevant WEL's can be found in our „Filter Guide“ where the information were taken from HSE publication EH40/2005 Workplace Exposure Limits, or you can source it from local authorities.

WEL's are occupational exposure limits (concentrations) of a specific airborne substance averaged over a reference period, to which workers may be exposed without experiencing significant adverse health effects. There are two reference periods for which the WELs may be set: 8-hour Time Weighted Average (TWA) and 15-minute Short Term Exposure Limit (STEL).

TWA (Time Weighted Average) – 8 hours (long term)

TWAs are set to help preventing health effects which require prolonged or accumulated exposure.

STEL (Short Term Exposure Limit) – 15 minutes (short term)

STELs are set to help prevents health effects which may be seen after short exposure (e.g. eye irritation that could occur after a few minutes) The absence of a substance from the list of WELs does not indicate that it is safe. For these substances, exposure should be controlled to a level to which nearly all the working population could be exposed, day after day at work, without any adverse effects on health.

3. You need to determine the needed minimum protection factor of RPE

For example: Powered air purifying respirator incorporating a hood classified as TH3 according to EN 12 941 has a maximum inward leakage of 0,2 %. Therefore NPF = 100 (%) : 0,2 (%)= 500.

EXAMPLE:

CONTAMINANT	ACETIC ANHYDRIDE (gas protection needed)
Concentration at the workplace	100 mg / m ³
WEL	2,5 mg / m ³

$$\text{Minimum protection factor} = \frac{\text{Concentration at the workplace}}{\text{WEL}} = \frac{100}{2,5} = 40$$

NOMINAL PROTECTION FACTOR (NPF)

Theoretical level of protection of Respiratory Protective Equipment calculated using performance data measured in the laboratory. It indicates the mathematically calculated maximum breathing protection performance. Calculated by dividing 100 by the total value of maximum inward leakage as specified in the relevant standard.

Nominal protection factors (NPF) and assigned protection factors in different countries

DESCRIPTION / DEVICE	CLASS	NPF	ASSIGNED PROTECTION FACTORS (USED IN SOME COUNTRIES)				
			FIN	D	I	S	UK

Continuous flow compressed airline breathing apparatus EN 14594	1A/1B	10	-	-	-	-	-
	2A/2B	50	-	-	-	-	-
	3A/3B	200	-	-	-	-	-
	4A/4B	2000	-	-	-	-	-

WHAT IS THE MAXIMUM CONCENTRATION OF THE CONTAMINANT FOR WHICH I CAN USE RESPIRATORY PROTECTION?

You can determine the maximum permissible concentration by multiplying the nominal protection factor (as found in the NPF table) by the Workplace Exposure Limit

CAUTION!

In the case where the contaminants are present in both particle and gas form, the necessary NPF must be established for each one separately and the higher protection factor must be applied.

CA-1

Ultralight hood with superior breathing protection

This short light hood is an optimal solution for respiratory protection and face protection in dusty and light chemical environments where no further mechanical protection is required. In combination with PAPR or airline systems CleanAIR® it reaches the highest level of respiratory protection.

It perfectly fits to various head types due to adjustable headgear and comfortable elastic rubber band. The distance of the visor can be set individually, as well as the perimeter of the headgear. The light nylon fabric and spacy cut makes it pleasant to wear even for long time work. The wide panoramic visor with antifog coating ensures undisturbed view and provides basic mechanical protection of the eyes.

PRODUCT DESCRIPTION	PRODUCT CODE
Short protective hood CA-1, orange	72 01 02
Short protective hood CA-1, blue	72 01 02B

TECHNICAL DATA	
PARAMETERS	SPECIFICATION
Weight	180 g
Material	hood – nylon visor – cellulose propionate
Protection factor (NPF)	500
Hose connection	QuickLOCK™
Certification	EN 12941 TH3 EN 14594 3A EN 166 1 S F

APPROVED COMBINATIONS		
CleanAIR® Chemical 2F	CleanAIR® Chemical 3F	CleanAIR® Pressure Flow Master
		

FEATURES AND BENEFITS

- Superior breathing protection
- Wide visor with antifog coating
- Individual headgear settings – adjustable perimeter and distance from the visor
- Pleasant to wear due to the spacy cut and light weight durable material
- Provides full protection of the eyes according to EN 166
- Practical reflective tab on the top

AREAS OF APPLICATION

The hood is suitable for work in dusty and light chemical environments in pharmaceutical and chemical industries.

CA-2

Ultralight long hood with superior breathing protection

This long light hood ensures respiratory protection and protection of the head, neck and shoulders in dusty environments where no further mechanical protection is required. In combination with PAPR or airline systems CleanAIR® it reaches the highest level of breathing protection.

It perfectly fits to various head types due to adjustable headgear and comfortable elastic rubber band. The distance of the visor can be individually set, as well as the perimeter of the headgear. The light nylon fabric and spacy cut makes it pleasant to wear even for long time work. The wide panoramic visor with antifog coating ensures undisturbed view and provides basic mechanical protection of the eyes.

FEATURES AND BENEFITS

- Superior respiratory protection
- Wide visor with antifog coating
- Individual headgear settings – adjustable perimeter and distance from the visor
- Pleasant to wear due to the spacy cut and light weight durable material
- Provides full protection of the eyes according to EN 166
- Practical reflective tab on the top
- Protection of the upper part of the body

AREAS OF APPLICATION

The hood can be used in dusty or light chemical environments. It is suitable for spraying and painting operations as well as for use in laboratories and pharmaceutical industry.

CA-10

Superior breathing protection with high chemical resistance

This chemically resistant hood ensures respiratory protection and protection of the head, neck and shoulders in the most demanding chemical environments. In combination with PAPR or airline systems CleanAIR® it reaches the highest level of breathing protection. The hood has increased durability and can be decontaminated because of the light laminated fabric with taped seams. It is still very light and comfortable thanks to the inner antiseptic fabric which absorbs sweat and at the same time creates an additional sealing. It perfectly fits to various head types due to adjustable headgear and comfortable elastic rubber band. The distance of the visor can be individually set, as well as the perimeter of the headgear. The wide panoramic visor with antifog coating ensures undisturbed view and provides basic mechanical protection.

FEATURES AND BENEFITS

- Superior respiratory protection
- Durable and decontaminable
- Inner antiseptic fabric that absorbs sweat and provides extra sealing
- Wide visor with antifog coating
- Individual headgear settings – adjustable perimeter and distance from the visor
- Pleasant to wear due to the spacy cut and light weight durable material
- Provides full protection of the eyes according to EN 166
- Practical reflective tab on the top

AREAS OF APPLICATION

The hood can be used in all environments demanding high durability and chemical resistance. It is suitable for spraying and painting operations as well as for use in laboratories and pharmaceutical or chemical industries.

UniMask

Light universal face shield providing the highest comfort and safety

The highest level of breathing protection with enhanced inner airflow regulation and a visor with excellent optical and mechanical features make this universal light face shield a true leader of its class. UniMask is light (just 380 g) and offers excellent user's comfort – the inner airflow regulation allows the user to set direction and intensity of the air to be delivered to the face or directly into the breathing zone. The users can opt for a soft textile or a neoprene face seal according to their preferences. The visor provides clear and undisturbed view of the highest quality (class 1 according to EN 166), high mechanical resistance and anti-fog coating. UniMask is easy to use and all spare parts are quickly and easily removable which enables fast and simple maintenance.

APPROVED COMBINATIONS		
<p>CleanAIR® Chemical 2F</p> 	<p>CleanAIR® Chemical 3F</p> 	<p>CleanAIR® Pressure Flow Master</p> 

FEATURES AND BENEFITS

- The highest class of breathing protection TH3
- Enhanced inner airflow regulation
- Light weight – only 380 g
- Excellent optical quality EN 166 class 1
- High mechanical resistance of the visor
- Anti-fog coating
- Safety helmet compatible
- Neoprene or textile face seal option
- Easy to use and adjust
- Fast and simple maintenance

AREAS OF APPLICATION

UniMask can be used for spray painting or surface finishing operations in environments with low demands on chemical resistance, typically in chemical and pharmaceutical industries and laboratories.

EASY AND QUICK CHANGING OF THE VISOR

In case the visor has to be replaced or separately cleaned, it can be easily removed and attached back to the hood using two simple locking knobs.

TORIC VISOR WITH AN EXCELLENT OPTICAL QUALITY

UniMask is the only universal faceshield of its class on the market with a toric visor which offers the best class of optical quality [EN 166 class 1]. The visor with anti-fog / anti-scratch coating guarantees excellent field of vision and increased durability. It provides protection against high-speed particles with medium energy.

Spare protective visor UniMask, clear	72 03 30
Spare protective visor UniMask, yellow	72 03 30.01
Spare protective visor UniMask, shade 3	72 03 30.02
Spare protective visor UniMask, shade 5	72 03 30.03

INNER AIRFLOW REGULATION

QUICKLY EXCHANGEABLE FACE SEAL WITH EASY MAINTENANCE

The face seal ensures secure and comfortable fit for the wearer. Thanks to a fast click-in system the face seal can be easily and quickly removed and attached back. The face seals can be washed in a washing machine and even dried in the dryer.

FACE SEAL MATERIAL AND COLOUR OPTIONS

The face seals for UniMask are available in two material options to better suit various user preferences.

Soft textile face seal ensures perfect absorption of sweat and is available in four colour options.

Face seal UniMask, grey	72 03 50.01
Face seal UniMask, blue	72 03 50.02
Face seal UniMask, orange	72 03 50.03
Face seal UniMask, red	72 03 50.04

Neoprene face seal is more convenient for spaces with higher concentrations of dust because it is easier to clean.

Face seal UniMask, neoprene	72 03 50.08
-----------------------------	-------------

SAFETY HELMET COMPATIBLE

UniMask can be used with a wide range of industrial safety helmets to provide a handy solution of head protection combined with protection of the face and breathing.

CA-3

Spacy shield with an unlimited view

This popular light protective shield with a wide acetate visor provides respiratory protection and face protection against splashing chemicals. The visor offers a broad and clear field of vision, high chemical resistance and protection against liquid spraying. Changing the visor is easy and does not require any special skills. The wearers appreciate its spaciousness and comfort due to the soft sweatband and adjustable headgear. Attention! Acetate visor is not recommended for grinding operations!

PRODUCT DESCRIPTION

Protective shield CA-3 (acetate)

PRODUCT CODE

FEATURES AND BENEFITS

- Light and spacious face shield
- Broad field of vision
- High chemical resistance
- Easily exchangeable visor
- Comfortable adjustable headgear
- Soft headband

AREAS OF APPLICATION

CA-3 finds application in many sectors like environments with high chemical resistance requirements, chemical industry, laboratories and spray painting.

CA-4

Lightweight industrial safety helmet with air distribution

CA-4 safety helmet combines respiratory protection with protection of the head, face and ears and can be modified according to the wearer's needs. The helmet can be equipped with further safety elements: an additional flip-up acetate visor (transparent or green DIN 5), earmuffs or a long cape for protection of the neck against splashing liquids. The wide panoramic visor with an anti-fog coating enables good orientation. The helmet fits well thanks to adjustable headgear and is provided with a sweatband.

FEATURES AND BENEFITS

- Combined respiratory protection and protection of the head, face and ears
- Wide field of vision
- Anti-fog coating
- Comfortable adjustable headgear

AREAS OF APPLICATION

The helmet can be used in chemical industry and laboratories as well as for chemical spraying.

GX02

High-end full face mask with advanced ergonomic design

The full face mask Shigematsu GX02 offers the highest level of respiratory protection in highly contaminated environments. The mask can be used with a wide range of standard canister filters and powered air purifying systems CleanAIR®. The mask body is made of a high quality silicone which ensures extensive chemical resistance and a long operation life. Its double seal flange maintains maximal seal while keeping the high level of comfort for the wearer supported by two exhalation valves reducing the breathing resistance and keeping the mask cool and dry. The six point head harness ensures secure and easy fit. The wide panoramic visor provides a broad visual field. The visor is equipped with antiscratch coating that guarantees high mechanical resistance which can be further increased by a protection foil. The visor is exchangeable. The mask is equipped with a speech diaphragm which facilitates communication.

CleanAIR® Chemical 2F	CleanAIR® Chemical 3F	CleanAIR® Asbest	CleanAIR® D-Bug	CleanAIR® For Mask

FEATURES AND BENEFITS

- Double seal flange for maximum protection and comfort
- High chemical resistance
- Exchangeable wide panoramic visor
- Anti scratch coating
- Six point head harness
- Two exhalation valves ensure a low breathing resistance
- Speech diaphragm
- Visor protection foil available

AREAS OF APPLICATION

The mask is suitable for use in the environments with heavy chemical or biological contamination and meets the highest demands on respiratory protection. Besides chemical industry it can be used in pharmaceutical industry, laboratories, spraying facilities and in remediation operations.

CF02

Lightweight full face mask with a superior visor

CF02 is a lightweight full face mask suitable to the demanding chemical conditions. The mask can be used with a wide range of standard canister filters and powered air purifying systems CleanAIR®. The mask has a superior spherical visor which is minimizing the distance between the eyes and the visor. This design feature eliminates distortion and provides clear and broad field of vision. The visor is equipped with anti-scratch coating that guarantees high mechanical resistance which can be further increased by a protection foil. The mask body is made of high quality Styrene TPE which guarantees high chemical resistance and a long operation life. The six point head harness ensures a secure and easy fit. Its non-sticky surface prevents hair from tangling.

CleanAIR® Chemical 2F	CleanAIR® Chemical 3F	CleanAIR® Asbest	CleanAIR® D-Bug
			

FEATURES AND BENEFITS

- Lightweight – 435 g
- High chemical resistance
- Superior spherical visor
- Anti-scratch coating
- Six point head harness
- Can be used with a wide range of canister filters
- Two exhalation valves – low breathing resistance
- Protection foil available

AREAS OF APPLICATION

The mask is suitable for use in the chemical or biological conditions and meets the highest demands on respiratory protection. Besides in the challenging chemical industry it can be used in pharmaceutical industry, laboratories, spraying facilities and in remediation operations.

CleanAIR® Ultimate

A revolutionary concept of an overpressured protective suit for highly contaminated environments.

The system uniquely combines the highest protection level of the full face mask with all the benefits of the ventilated protective coverall.

The CleanAIR® Ultimate coverall is designed solely for use in combination with the headtop CleanAIR Ultimate GX and the powered air purifying respirator CleanAIR® Chemical 2F.

PRODUCT DESCRIPTION	PRODUCT CODE
CleanAIR® Ultimate 2500 Protective Coverall - size S/M/L/XL, pack of 20 pcs	90 25 00*/20

AVAILABLE FILTER TYPE		
PARTICLES	COMBINED - Class 1	COMBINED - Class 2
	N/A	

FEATURES AND BENEFITS

- Easy to wear system
- Continuous respiratory protection even during doffing the suit
- The PAPR and filters are completely sheltered by the coverall
- High level of airflow for greater comfort
- Advantageous economical operation

AREAS OF APPLICATION

- Remediation operations, laboratories, pharmaceutical industry
- First responders and emergency teams
- Biological protection

HOW IT WORKS?

The filtered air is driven through the air hose right into the face mask, while the surplus and the exhaled air goes into the coverall and creates overpressure. The PAPR including filters stays sheltered under the coverall. The connection between the suit and the filters is built up by special **garment grommets**. This design solution allows continuous respiratory protection even during the procedure of doffing the suit.

ULTIMATE GX

The face piece Ultimate GX offers all the benefits of panoramic full face mask Shigematsu GX02 and at the same time it ensures a simple connection to the built-in blower unit. The secure connection of the hood with the full face mask Ultimate GX is provided by a unique clamp frame.

CleanAIR® Ultimate GX, size S, incl. clamp frame, grommets 2 pcs	73 06 01S
CleanAIR® Ultimate GX, size M, incl. clamp frame, grommets 2 pcs	73 06 01M
CleanAIR® Ultimate GX, size L, incl. clamp frame, grommets 2 pcs	73 06 01L
Clamp frame Ultimate	73 06 10

ULTIMATE 2500 COVERALL

Delivers maximum strength and liquid and particle barrier properties. Special emphasis was placed on intuitive and easy donning and doffing.

Elasticated face opening allows easy attachment to the Ultimate GX face piece. The coverall is supplied with elasticated wrists, ankles and waist and incorporates a two way front zipper and extended storm flaps.

CleanAIR® Ultimate 2500 coverall is designed solely for use in combination with CleanAIR® Ultimate GX mask and the powered air respiratory system CleanAIR® Chemical 2F.

The complete system CleanAIR Ultimate provides respiratory, face and body protection from solid and liquid aerosols, particulate radioactive contamination or infective agents.

CleanAIR® Ultimate 2500 Protective Coverall - size S/M/L/XL, pack of 20 pcs	90 25 00**/20
** Add S/M/L/XL for the required size	

THE SYSTEM IS POWERED BY CLEANAIR® CHEMICAL 2F

For a more detailed information please refer to page 28 of this catalogue.

Chemical 2F

Compact, lightweight yet powerful... Meet the most versatile and durable respirator on the market.

Despite its compact design and low weight, Chemical 2F is characterized by outstanding durability, chemical resistance and increased ingress protection. The thought-out design with a smooth surface allows easy decontamination by shower or even full immersion. The unique automatic closing system prevents unwanted contamination while the filters are being changed. The smart Flow Control system maintains the airflow on the constant level regardless filter clogging or low battery charge. Audiovisual alarm indicates when the battery charge and/or filter replacement is required. Adjustable airflow from 120 up to 235 lpm is available during the whole shift no matter of the type of the filter thanks to optional Heavy Duty battery.

AVAILABLE FILTER TYPE

PARTICLES	COMBINED - Class 1	COMBINED - Class 2
		

* for all available filter configurations (gas, combined) please refer to the "Spare parts" of the catalogue

FEATURES AND BENEFITS

- Compact design and low weight
- Compatible with a hood, mask or ventilated protective suit
- High mechanical and chemical resistance
- Increased ingress protection allows decontamination by shower or even full immersion (**IP64/IP65/IP68**)
- Full colour display clearly shows all the relevant information - filter clogging, battery charge, airflow
- Flow Control system maintains constant airflow regardless of the level of filter clogging or battery charge
- Operation time up to 16 hours with Heavy Duty battery, or up to 10 hours with standard battery
- Short battery recharging time < 3 hours (standard battery)
- Audiovisual alarm
- Multilingual user interface
- Back harness available for increased comfort

AREAS OF APPLICATION

- Heavy industrial environments including chemical and pharmaceutical industry
- Remediation operations, laboratories
- First responders and emergency teams
- Biological protection

FULL COLOUR DISPLAY

Full colour display clearly shows all the relevant information – airflow, battery charge, filter clogging.

FILTER TIMER

Just set the filter timer according to your needs and the system will trigger the alarm when filter replacement is required.

COMPATIBLE WITH MICROGARD/ MICROCHEM PAPR PROTECTIVE SUITS

Ventilated suits with filtered air (powered by CleanAIR® Chemical 2F) and MICROGARD® / MICROCHEM® technology provide respiratory, face and body protection from various hazardous substances including but not limited to solid and liquid aerosols, asbestos, paint, oil, grease, viruses and blood borne pathogens.

AUTOMATIC CLOSING SYSTEM

The unique automatic closing system prevents unwanted contamination while the filters are being changed.

DIFFERENT POWER SUPPLY OPTIONS

You can choose between the standard battery, heavy-duty battery or non-rechargeable primary battery. Besides standard charger there are available power adaptors either for car power socket or for the main socket as an alternative power source.

POWER ADAPTORS

Power adaptor 230 V / 24 V for the main socket	51 00 15.1
Power adaptor 12 V -24 V - car power socket	51 00 15.2

HEAVY DUTY BATTERY

The high capacity battery doubles the operation time. No more necessary changing or charging the battery during a long shift even when using gas and combined filters.

Battery Li-Ion Heavy Duty, Li-Ion 14,4V / 5,2Ah	51 00 20
---	----------

PRIMARY BATTERY

Non rechargeable one-time use battery with guaranteed 10 years storage time. The battery is ready anytime you need without the necessity of charging.

The perfect choice for emergency teams, first responders, or those who need to use the respiratory system only in case of an emergency.

Primary Lithium battery	51 00 11
-------------------------	----------

BACK HARNESSES FOR INCREASED BACK SUPPORT AND HIGHER COMFORT

Comfort padded harness	52 00 44.1
Decontaminable harness	51 00 42

MAXIMIZED WATER INGRESS PROTECTION IP68

The thought-out design with a smooth surface allows easy decontamination by the shower or even full immersion.

IP64 Shower decontamination¹ – full protection from splash of liquids from any angle

IP65 Shower decontamination² – full protection from water jets from any angle.

IP68 Immersion disinfection³ – full protection from continuous submersion in water/disinfection solution. Disinfection of CleanAIR® Chemical 2F is feasible e.g. with sodium hypochlorite solution and peroxyacetic solution (Persteril).

¹ When the system is ON, fitted with CleanAIR® filters

² When the system is ON, fitted with CleanAIR® filters incorporating pre-filter holder and spark arresters

³ When the system is OFF, fitted with decontamination plugs

Chemical 2F Ex

The most versatile and durable respirator is newly available in ATEX version which can be used in potentially explosive atmospheres.

Despite its compact design and low weight, Chemical 2F is characterized by outstanding durability, chemical resistance and increased ingress protection. The thought-out design with smooth surface allows easy decontamination by shower or even full immersion. The unique automatic closing system prevents unwanted contamination while the filters are being changed. The smart Flow Control system maintains the airflow constant regardless filter clogging or low battery charge. Audiovisual alarm indicate when the battery charge and/or filter replacement is required. Airflow is individually adjustable from 120 lpm up to 235 lpm.

FEATURES AND BENEFITS

- Compact design and low weight
- Specially adapted for use in potentially explosive atmospheres – approved to Zone 2
- Compatible with a hood, mask or ventilated protective suit
- High mechanical and chemical resistance
- Increased ingress protection allows decontamination by shower or even full immersion [**IP64/IP65/IP68**]
- Full colour display clearly shows all the relevant information - filter clogging, battery charge, airflow
- Flow Control system maintains constant airflow regardless of the level of filter clogging or battery charge
- Short battery recharging time < 3 hours
- Audiovisual alarm
- Multilingual user interface

AREAS OF APPLICATION

- Potentially explosive atmospheres – approved to Zone 2
- Heavy industrial environments including chemical and pharmaceutical industry
- Remediation operations, laboratories
- First responders and emergency teams
- Biological protection

Chemical 3F

Powerful and durable respirator for the most demanding industrial applications

High level of performance, mechanical and chemical resistance, UV resistance and ingress protection IP64 guarantee the sufficient protection of the wearer even in heavy industrial environments, the chemical industry, laboratories and pharmaceutical industry. Airflow can be individually set according to the user's needs. The outstanding performance makes the system very suitable especially for highly contaminated workplaces.

D-Bug

Exceptionally light powered air purifying respirator with a versatile use

CleanAIR® D-BUG offers its users a choice of particle or combined filters on a lightweight powered air purifying respirator mountable directly on the full face mask. This solution offers respiratory and face protection against harmful particles, gases or vapours. The system offers two options of wearing: for maximal freedom of movement it can be attached directly to the full face mask or for minimal weight carried on the head it can be placed on the belt using a hose and a special adaptor supplied with the respirator. The complete system with a full face mask Shigematsu and a highly effective filter guarantees a high nominal protection factor (NPF 2000) and a sufficient airflow. The respirator is equipped with a new brushless motor that maintains its speed on a constant level and with a low battery indication. Special emphasis was placed on the low weight, simple operation and a long operation life of the system. The respirator can be decontaminated by a shower.

PRODUCT DESCRIPTION

CleanAIR® D-Bug including accessories (battery, 2x filter ABEP, hose 350mm, charger, belt and flow indicator – without mask!)

FEATURES AND BENEFITS

- Can be used with particle or combined filters
- Compact design and light weight
- Simple operation
- Low battery indication
- Mountable directly to the mask or on the belt
- Decontaminable by a shower
- Operation time can exceed 7 h depending on airflow and filters used
- Compatible with full face masks Shigematsu GX02 and CF02
- High nominal protection factor NPF 2000

AREAS OF APPLICATION

The system is suitable for use in the environments with particulate or chemical contamination such as in the building industry, agriculture, public maintenance services, for remediation operations, pest control.

Pressure

Solutions for compressed air

Systems CleanAIR® Pressure/Pressure Flow Master are constant flow supplied air respirators suitable for a long term work in the heaviest industrial environments. The regulator on the belt unit can adjust the amount of air coming from the central compressed air distribution system or a compressor and keeps it at a constant level without regard to the changes of inlet pressure.

PRODUCT DESCRIPTION	PRODUCT CODE
CleanAIR® Pressure including accessories (belt and flow indicator)	63 00 00
CleanAIR® Flow Master including accessories (comfort belt and flow indicator)	67 00 00

AVAILABLE FILTER TYPE	
<p>COMBINED Pressure Conditioner filter</p> 	<p>CleanAIR® Conditioner contains the high capacity combined filter that removes solid particles, oil mist and unpleasant odours. It ensures that the quality of the compressed air in the distribution system complies with the requirements of regulation EN 12021.</p>

FEATURES AND BENEFITS

- Low weight
- Economical operation
- High levels of airflow
- Warning low pressure system (Pressure Flow Master)
- Option of filtration of supplied air with CleanAIR® Conditioner
- Compatible with a wide range of CleanAIR® headtops

AREAS OF APPLICATION

Suitable to the heavy industrial environments, laboratories and to the chemical industry.

CleanAIR® Pressure Basic regulator

CleanAIR® Pressure Flow Master Regulator with low pressure warning system and manometer

Pressure For Mask

The highest level of protection for particularly toxic environments

The CleanAIR® Pressure for Mask is comfortable and versatile, highly effective constant flow airline system for use with the Shigematsu GXD2 mask. The unique filter back up feature allows the user to keep breathing normally through the passive particle or combined filter in case of sudden failure of the air supply and provides breathing protection in case of emergency evacuation. The system allows the user to adjust the airflow from 170 lpm up to 250 lpm and keeps it at constant level regardless to changes of inlet pressure. In addition to the airflow regulation (170 - 250 lpm) the system is equipped with a warning whistle. It warns the user if the inlet pressure drops below the bottom limit of operating pressure (350 kPa). CleanAIR® Pressure for Mask was especially designed for long wearing periods or for workplaces where the contaminants are highly toxic and have poor warning properties. It is decontaminable by shower and it provides the maximum nominal protection factor of 2000 in accordance with EN 14594:05 (class 4B).

PRODUCT DESCRIPTION	PRODUCT CODE

AREAS OF APPLICATION

Long time work in industrial environments with highly toxic contaminants, constructions and food processing industry, closed tanks, tunnels.

GX02/CF02 & Chemical 2F Asbest

The high performance respiratory protection system for environments contaminated by asbestos fibres.

The combination of the powered air respirator Chemical 2F and the high quality full face masks GX02/CF02 characterizes excellent durability and the highest level of respiratory protection. The smart Flow Control system ensures a constant air flow, regardless of whether the filter is clogged or the battery is running low. The audiovisual alarm indicates when the battery needs to be charged or the filter needs to be replaced. With the two options available for full-face masks, users can choose the perfect mask for comfort and a secure fit based on their individual needs.

* at 160 lpm with brand new P R SL filters and fully charged battery

FEATURES AND BENEFITS

- Compact design and low weight
- High mechanical and chemical resistance
- Increased ingress protection allows decontamination by shower or even full immersion (**IP64/IP65/IP68**)
- Full colour display clearly shows all the relevant information - filter clogging, battery charge, airflow
- Flow Control system maintains constant airflow regardless of the level of filter clogging or battery charge
- Operation time up to 16 hours with Heavy Duty battery, or up to 10 hours with standard battery
- Audiovisual alarm
- Multilingual user interface
- Back harness available for increased comfort

AREAS OF APPLICATION

Remediation operations, building & construction.

FULL COLOUR DISPLAY

Full colour display clearly shows all the relevant information – airflow, battery charge, filter clogging.

FILTER TIMER

Just set the filter timer according to your needs and the system will trigger the alarm when the filter replacement is required.

COMPACT DESIGN AND LOW WEIGHT

The thought-out design with smooth surface allows easy decontamination by shower or even full immersion.

HEAVY DUTY BATTERY

The high capacity battery doubles the operation time. No more necessary to change or recharge the battery during long shift including combination/ even if using the system with gas and vapour filters.
Battery Li-Ion Heavy Duty, Li-Ion 14,4V / 5,2Ah 51 00 20

AUTOMATIC CLOSING SYSTEM

The unique automatic closing system prevents unwanted contamination while the filters are being changed.

MAXIMIZED WATER INGRESS PROTECTION IP68

The thought-out design with a smooth surface allows easy decontamination by the shower or even full immersion.

IP64 Shower decontamination¹ – full protection from splash of liquids from any angle

IP65 Shower decontamination² – full protection from water jets from any angle.

IP68 Immersion disinfection³ – full protection from continuous submersion in water/disinfection solution. Feasible disinfection with sodium hypochlorite solution and peroxyacetic solution (Persteril).

¹ When the system is ON, fitted with CleanAIR® filters

² When the system is ON, fitted with CleanAIR® filters incorporating pre-filter holder and spark arresters

³ When the system is OFF, fitted with decontamination plugs

SHIGEMATSU GX02

High-end full face mask with advanced ergonomic design

FEATURES AND BENEFITS

- Double seal flange for maximum protection and comfort
- High chemical resistance
- Exchangable wide panoramic visor
- Anti scratch coating
- Six point head harness
- Two exhalation valves ensure a low breathing resistance
- Speech diaphragm
- Visor protection foil available

SHIGEMATSU CF02

Lightweight full face mask with a superior visor

FEATURES AND BENEFITS

- Lightweight – 435 g
- High chemical resistance
- Superior spherical visor
- Anti-scratch coating
- Six point head harness
- Can be used with a wide range of canister filters
- Two exhalation valves – low breathing resistance
- Protection foil available

GX02/CF02 & CleanAIR® Asbest

Simple operation, maximum versatility...

The powered air respirator CleanAIR® Asbest and the high quality full face masks GX02/CF02 offer an exceptionally light and compact combination with excellent durability and the highest level of respiratory protection. The complete combination of CleanAIR® Asbest with a full face mask Shigematsu and a highly effective filter against particles guarantees high nominal protection factor (NPF 2000), sufficient airflow and simple decontamination. The system is designed for active respiratory and face protection during remediation of asbestos-containing materials and can be mounted directly on the mask or connected to the mask with a hose and worn on a belt. Special emphasis has been placed on the low weight and simple operation.

PRODUCT DESCRIPTION	PRODUCT CODE

FEATURES AND BENEFITS

- Compact design and light weight – 385 g
- Simple operation
- Mountable directly to the mask or on the belt
- Decontaminable by a shower
- Operation time up to 5 h
- High nominal protection factor NPF 2000
- Low battery indication

AREAS OF APPLICATION

The system is suitable for use in the environments with particulate contamination, especially for asbestos remediation operations or in the building industry.

TWO WEARING OPTIONS

The blower unit can be mounted directly on the full face mask or connected to the mask with a hose and worn on a belt.

Wearing the blower on the belt minimizes the weight carried on the user's head.

EXCEPTIONALLY LIGHT AND COMPACT RESPIRATOR

Special emphasis was placed on the low weight and simple operation. The exchangeable Li-Ion battery is seamlessly integrated into the unit body.

When placed directly on the mask, there are no cables or hoses that would limit your movement.

TWO MASK OPTIONS

SHIGEMATSU GX02

PARTICLES	COMBINED - Class 1	COMBINED - Class 2
	N/A	

FEATURES AND BENEFITS

- Easy to wear system
- Continuous respiratory protection even while doffing the suit
- The PAPR and filters are sheltered by the coverall
- High level of airflow for greater comfort
- Economical operation

AREAS OF APPLICATION

- Remediation operations, laboratories, pharmaceutical industry
- First responders and emergency teams
- Biological protection

HOW IT WORKS?

The filtered air is driven through an air hose right into the face mask, while the surplus and the exhaled air goes into the coverall and creates overpressure. The PAPR including filters stays covered under the coverall. The connection between the suit and the filters is built up by **special garment grommets**. This design solution allows continuous respiratory protection even during the procedure of doffing the suit.

ULTIMATE GX

The face piece Ultimate GX offers all the benefits of panoramic full face mask Shigematsu GX02 and at the same time it ensures a simple connection to the built-in blower unit. The secure connection of the hood with the full face mask Ultimate GX is provided by a special clamp frame.

CleanAIR® Ultimate GX, size S, incl. clamp frame, grommets 2 pcs	73 06 01S
CleanAIR® Ultimate GX, size M, incl. clamp frame, grommets 2 pcs	73 06 01M
CleanAIR® Ultimate GX, size L, incl. clamp frame, grommets 2 pcs	73 06 01L

ULTIMATE 2500 COVERALL

Delivers maximum strength and liquid and particle barrier properties. Special emphasis was placed on intuitive and easy donning and doffing.

Elasticated face opening allows easy attachment to the Ultimate GX face piece. The coverall is supplied with elasticated wrists, ankles and waist and incorporates a two way front zipper and extended storm flaps.

CleanAIR® Ultimate 2500 coverall is designed solely for use in combination with CleanAIR® Ultimate GX mask and the powered air respiratory system CleanAIR® Chemical 2F.

The complete system CleanAIR Ultimate provides respiratory, face and body protection from solid and liquid aerosols, particulate radioactive contamination or infective agents.

CleanAIR® Ultimate 2500 Protective Coverall - size S/M/L/XL, pack of 20 pcs	90 25 00**/20
** Add S/M/L/XL for the required size	

THE SYSTEM IS POWERED BY CLEANAIR® CHEMICAL 2F

For a more detailed information please refer to page 28 of this catalogue.

Filters

The complete range of CleanAIR® canister filters offers a wide selection of filters for most industrial applications, pharmaceutical industry, laboratories and agriculture. The filters are supplied with a standard connection thread RD40×1/7" according to EN 148-1.

Particle filters catch a wide range of solid particles in the form of liquid and solid aerosols such as dust, smoke, fibres, bacteria, viruses and radioactive particles.

Gas filters provide protection against contaminants in the form of gases and vapours.

Combined filters provide protection against a combination of contaminants in the form of gases, vapours and solid particles.
