

SAFETY HELMET CA-40

New Accessories

**EVEN BETTER
VERSATILITY.**

CleanAIR®

work hard • breathe easy

WHAT'S NEW

Discover the latest additions to the modular CA-40 helmet system. New accessories let you upgrade your existing helmet or choose a ready-to-use complete configuration for your application.

ACCESSORIES AND SETS

Easy-care face seal for CA-40

Art. No.: 704062

Made entirely of durable grey PVC-coated fabric, this easy-care face seal is the ideal choice for wet and demanding working environments. Its non-absorbent surface helps repel moisture and liquid splashes while allowing quick and easy cleaning. The integrated exhalation valve further enhances user comfort.

Also available as a complete set:

Safety helmet CA-40 with grinding visor, Easy-care face seal

Art. No.: 704162

Protective long shroud with neck-seal for CA-40

Art. No.: 704063

A long protective shroud with an extended protective cape providing additional coverage of the neck and shoulders. Sealing comfortably around the neck without affecting the helmet or visor configuration, it is well suited to wet and demanding working environments. Made entirely of durable grey PVC-coated fabric, the non-absorbent material helps repel moisture and liquid splashes while ensuring quick and easy maintenance.

Also available as a complete set:

Safety helmet CA-40 with grinding visor, Easy-care long shroud

Art. No.: 704163

Neck protection for CA-40, leather, visor-mounted

Art. No.: 704066

Leather neck protection designed for mounting to the CA-40 grinding visor. Providing additional protection of the neck against sparks and flying particles, it maintains user comfort and freedom of movement. The dedicated attachment system allows quick and easy installation directly on the visor holders while ensuring a secure fit during use.

Spare add-on shield CA-40 for passive visors

Art. No.: 704140

The add-on shield extends the functionality of the CA-40G helmet by providing additional protection and flexibility for changing work conditions. While the main visor offers excellent visibility and mechanical resistance for grinding applications, the add-on shield allows quick adaptation for additional tasks requiring different visor types or shades.

The flip-up/flip-down mechanism enables easy switching between various passive visors, including transparent, yellow, shade 3 and shade 5 variants, as well as cylindrical visors suitable for use with protective foils. This allows comfortable transitions between grinding, plasma cutting, painting and other demanding applications while maintaining the respiratory protection solution of the CA-40G system.

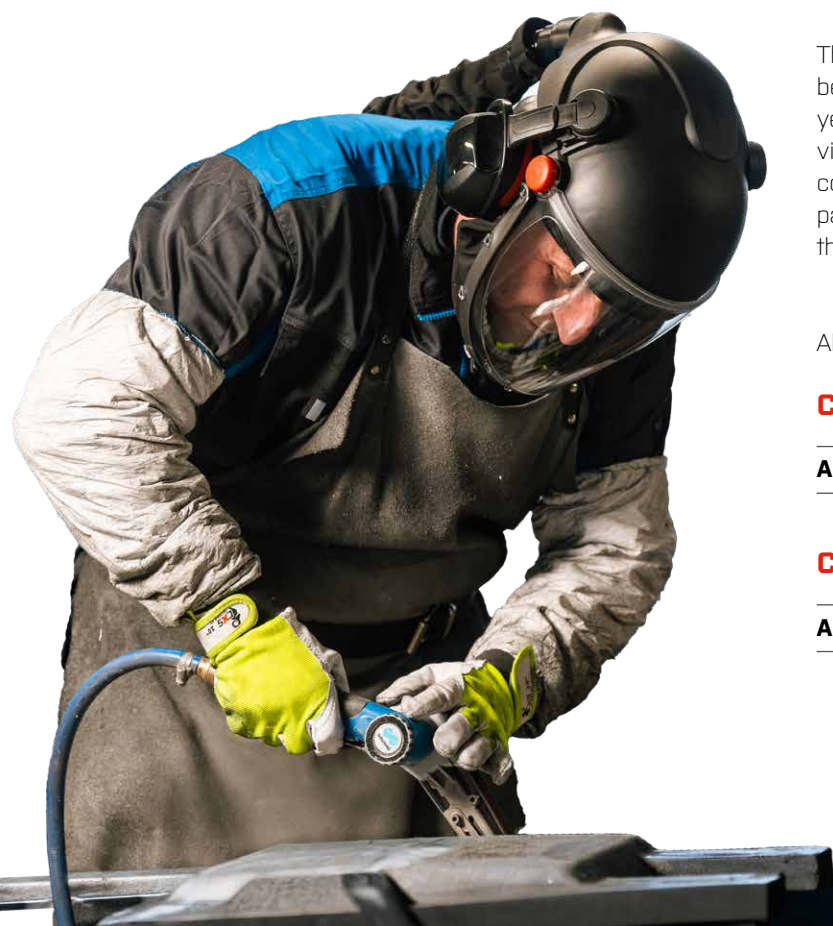

Also available as a complete set:

CA-40 with flip-up passive visor No. 3

Art. No. 704403

CA-40 with flip-up passive visor No. 5

Art. No. 704405

PROTECTIVE HOODS

Protective hood for helmet, splash-resistant (MF)

Art. No.: 704170

Lightweight protective hood designed to provide reliable splash protection. The sealed seams help maintain the integrity of the protective barrier, making it suitable for general industrial applications where liquid splash protection is required.

Protective hood for helmet, chemical-resistant (CPM)

Art. No.: 704171

Chemical-resistant protective hood. Manufactured from CPM material with sealed seams, it provides enhanced protection against chemical splashes while maintaining a secure and reliable fit.

Protective hood for helmet, washable

Art. No.: 704172

Reusable protective hood made from a smooth and durable washable fabric, providing excellent wearing comfort during extended use. The quiet, soft material combined with sealed seams offers reliable protection against liquid splashes while ensuring easy maintenance and long service life.

NEW HEAT-RESISTANT SOLUTION

CleanAIR®

work hard • breathe easy

Safety helmet CA-40GHS with grinding and heat-shield visor

Art. No.: 704300

The CA-40GHS extends the CA-40 helmet system with dedicated heat protection for foundries, metal processing and glass industry applications. The heat-resistant hood and external gold visor provide additional shielding against radiant heat, while the optimized design and secure holder ensure stable positioning and comfortable use in demanding environments.

EN ISO 11612 Certified

- ✓ Brief flame contact (A1)
- ✓ Convective heat (B1)
- ✓ Radiant heat (C3)
- ✓ Molten aluminium splash (D3)
- ✓ Molten iron splash (E3)
- ✓ Contact heat (F1)

Replacement Parts

The following components are available separately for replacement or maintenance:

Spare visor for CA-40, external heat-shield, incl. holders

Art. No.: 704302

Neck protection for visor, heat resistant

Art. No.: 704366

Protective hood, heat resistant, incl. neck protection

Art. No.: 704370

Hose cover, heat-shield (aluminised)

Art. No.: 710063

Spare protective heat visor V8, gold-plated, pack of 10 pcs

Art. No.: 729218/10

Illustrative images. Full protection according to EN ISO 11612 requires all protective clothing worn by the user to comply with this standard.

NEW AUTO-DARKENING WELDING FILTER

Auto-darkening welding filter AerTEC™ X220

Art. No.: 405220

The AerTEC™ X220 brings advanced welding protection to the CA-40 helmet system with a fully electronic control interface and digital LED display. The intuitive design allows easy adjustment of shade, sensitivity and delay settings without external control knobs, ensuring seamless integration with the flip-up visor configuration. Featuring TrueView+ technology, a large viewing area and excellent optical performance, it provides a clear and comfortable view for a wide range of welding applications.

HEARING PROTECTION

CleanAIR®

work hard • breathe easy

Helmet-Mounted Hearing Protection

Complete the CA-40 helmet system with integrated hearing protection. The helmet-mounted earmuffs are designed for seamless integration with the CA-40 system, providing a secure fit and unrestricted operation of the visor and respiratory protection. Soft sealing cushions ensure lasting comfort, while a choice of attenuation levels makes them suitable for a wide range of industrial applications.

Earmuffs for CA-40, SANA 25 S725

Art. No.: 714046

Earmuffs for CA-40, SANA 30 S730

Art. No.: 714047

Earmuffs for CA-40, SANA 34 S734

Art. No.: 714048

TOP 5 HIGHLIGHTS OF MALINA-SAFETY

CleanAIR®
work hard • breathe easy

More than 35 years of innovation in respiratory protection

From the launch of the first CleanAIR® unit in 1993 to today's advanced PAPR systems, we are among the technology leaders in the field of personal protection.

A Czech manufacturer with a global reach

CleanAIR® products are exported to more than 40 countries worldwide and protect professionals in industry, healthcare, and specialized applications around the globe.

In-House Development and Manufacturing

We develop and manufacture key technologies, filtration systems, and new product lines at our own production facilities in Jablonec nad Nisou and Železný Brod in the Czech Republic.

Proven Quality and Certifications

We hold ISO 9001 and AQAP 2110 (NATO) certifications, have been recognized for innovation, and are a long-standing, trusted partner to professionals working in demanding conditions.

Continuous Innovation and Investment in the Future

We are expanding our production capacity, modernizing our technologies, and strengthening our position as a leading Czech innovator with prospects for long-term global growth.
